Testwinner ROADBIKE 09/2019:  
Terra Speed TR

## Choose alter road. Choose Terra.

For your way off-road. For more comfort. For the adventure. Be it the long tour, or the shortcut on your way home. The new gravel Terra series by Continental gets you there.

The Terra Trail is the nobbiest model in our series, the Terra Speed is designed for momentum.

Made to get you over rough and smooth.

With our unique tread compound, which is produced only in Germany, we have revolutionised the sport of cycling. With the legendary **BlackChili Compound** we have answered the eternal question of the best balance of grip and rolling resistance for cycling. The latest polymers as well as specially developed carbon black particles and filler materials guarantee unique performance, be it on a road, gravel or a mountain bike, for time trialling or downhill.

**ProTecton-Technologie - transferred to the Race/Road segment**

The ProTecton-Technologie gives our tires their perfect mix of fast rolling, grip and puncture protection. Adheres well to the terrain, even on the toughest trails and features very good damping characteristics.

**Tubeless Ready** Developed especially for the mountain bike sector, this additional puncture protection layer which completely encircles both tire beads makes our carcasses robust and impervious against damage and penetration from foreign objects. For maximum effect we combine ProTecton with BlackChili Compound. The result: versatile, low weight and an attractive design. In addition, tires made using this technology can also be used as Tubeless Ready.

**Suitable for E-Bikes:** For our E-Bike tire we fall back on over 100 years' experience with moped and motorcycle tires. All of our city/trekking tires are rated to a standard speed of at least 25 km/h. Those tires marked e50 are also certified for S-Pedelecs. With their high quality structure, puncture protection is high and the rolling resistance is low offering protection from premature wear brought about by the additional driving force.

**BREAKER**

LIMITED EDITION

## Give something back to your city!

The tire made from dandelions, for the sustainable lifestyle.  
Grown and made in Germany. Comfortable race construction -  
ideal for the urban ride.

## TARAXAGUM

The Urban Taraxagum by Continental is the first serial bicycle tire made from dandelion rubber, for which we established the brand mark **Taraxagum™**. The project is embedded in a comprehensive sustainability strategy, covering economic, ecological and social aspects. Through significantly shorter distances from the fields and our European tire plants we reduce efforts in logistics and transport and use resources more efficiently.

### Another important contribution to sustainability - in series

## Vectran™ BREAKER

**Vectran™** is spun from liquid crystal-polymer. This way a thermoplastic, multiple-thread yarn is created. As a comparison: This partially crystalline fabric is more cut-resistant than aramide and its tensile strength is fivetimes higher than that of steel. A Vectran™ Breaker is lighter, more flexible and effective against cuts than a comparable nylon breaker. There is no detrimental effect on rolling resistance.

## Cycling on the City Pulse

Premium mobility for design enthusiasts. Urban profile packed with the latest technology. The perfect symbiosis between light-rolling and puncture protection reflected in this specialized tire designed for the City Jungle.

**Faster?**

Not a problem with approval for E-Bikes up to 50km/h

**PureGrip Compound** is derived from an activated Silica compound and is a good example of how we integrate customer feedback continuously into our research and development. This mixture technology fits in perfectly alongside the BlackChili Compound. The name PureGrip does exactly what it says; exceptionally good grip and durability are the distinguishing features of this compound.

### Safety Pro

The new **SafetyPro Breaker** designed from nylon textile. Cross-woven textile fiber netting that is simultaneously robust and flexible. Maximum puncture protection with minimal added weight. The risk of punctures resulting from glass or sharp stones is substantially reduced.

**Suitable for E-Bikes:** For our E-Bike tire we fall back on over 100 years' experience with moped and motorcycle tires. All of our city/trekking tires are rated to a standard speed of at least 25 km/h. Those tires marked e50 are also certified for S-Pedelecs. With their high quality structure, puncture protection is high and the rolling resistance is low offering protection from premature wear brought about by the additional driving force.

## Weltcup-Performance – handmade in Germany.

RaceSport stands for the optimal combination of lightweight and reasonable puncture protection without compromise. High tpi nylon casing coated with ultra-thin, rubber, gives the tire a superior balance of lightweight and race-worthy performance.

With our unique tread compound, which is produced only in Germany, we have revolutionised the sport of cycling. With the legendary **BlackChili Compound** we have answered the eternal question of the best balance of grip and rolling resistance for cycling. The latest polymers as well as specially developed carbon black particles and filler materials guarantee unique performance, be it on a road, gravel or a mountain bike, for time trialling or downhill.

Developed together with professional mountain bikers, the **RaceSport** carcass unites light-weight construction with noticeably improved puncture protection for the perfect competition choice. Light: contains a particularly fine, flexible nylon fabric with an elaborately produced protective rubber coating. Fast and reliable: World Cup quality, low rolling resistance and puncture protection. Combined with our legendary BlackChili Compound, the right combination for XC and Marathon racing.

## NEW SIZES

### Cross King

#### The all-rounder

Versatile competition and trail tire, sure footed in turns and comfortable. Good grip and available with various technologies. Smoothly rolling tire that adapts to any terrain with its special tread.

### Trail King

#### Super performance on every trail

This tire shines on enduro bikes and „all mountain“ bikes with a suspension travel of greater than 140mm, thanks to its comfortable and voluminous casing. Multitude of small knobs guarantee best traction on any difficult trail. Excellent puncture resistance and maximum stability.
